Thermal & Visual Properties

Fire Retardancy Information for NON FR Products:

Ignitability Index (Range 0-20): 12
Spread of Flame Index (Range 0-10): 9
Heat Evolved Index (Range 0-10): 3
Smoke Developed Index (Range 0-10): 6
Flammability Index: 60

Range: Item: Width: Roll Length:
82.536.9XX: 2800mm: 30 metres
82.036.9XX: 89mm: 100 metres
82.037.9XX: 127mm: 100 metres

Care & Cleaning

Dusting with a feather duster is all that is required to keep your fabric looking good. For the removal of stains, dirt and grime, gently wipe fabric skins with a sponge soaked in lukewarm water. If marks are still visible, add a little detergent. Then dry gently with a clean cloth. Test in inconspicuous area before spot cleaning.

Solar protection indicators are laboratory-tested. The most relevant and widely used thermal comfort factors include:

THERMAL COMFORT

Fabric Only

Ts Solar Transmittance (%)
Rs Solar Reflectance (%)
As Solar Absorbance (%)

Solar radiation is always partially transmitted through, absorbed or reflected by the fabric. The sum of all 3 equals 100. Ts + Rs + As = 100% of solar energy.

GLAZING & FABRIC

Test data has been supplied using the following glazing types:

• A Clear single glazing (4mm float)
• B Clear double glazing (4mm float + 12mm space + 4mm float)
• C Double glazing low-e coating and argon filled (4mm float + 16mm space + 4mm float)
• D Reflective double glazing with low-e coating and argon filled (4mm + 16mm space + 4mm float)

GTOT (RANGE 0-1)

The Solar Heat Gain Coefficient (SHGC), measures the window’s (fabric and glass) ability to transmit solar energy into a room. The SHGC is commonly referred to as g-tot. SHGC/g-tot is a calculation of the g-values of the solar protection device (fabric) and the glazing (A, B, C, D). The lower the GTOT value, the greater its ability to insulate against solar heat build-up.

VISUAL COMFORT

Fabric Only

TL Light Transmittance (%)
RL Light Reflectance (%)

The fenestration property tests were conducted in accordance with EN 410 (1998), EN 14501: (2005), and EN 14500: (2008).

Ignitability Index (Range 0-20): 12
Spread of Flame Index (Range 0-10): 9
Heat Evolved Index (Range 0-10): 3
Smoke Developed Index (Range 0-10): 6
Flammability Index: 60
